Why do I **NEED** a Fuel Management System?
Protection from Fuel Strikes and Shortages
Able to buy in bulk at bulk prices.
Plan strategic fuel purchase before price rises
Able to closely manage vehicle MPG’s.
Closer visibility and control over fuelling costs.
Reduces Fuel Theft through higher visibility of fuelling.
Less ‘off route’ driving to find fuel card sites (wasting valuable Fuel and drivers hours)
Ensures your Fuel is used for your Business:

Does your Fuel Get to your Site?
- Are you Invoiced for undelivered fuel?
- Is the Quantity delivered the same as that invoiced?
- Is fuel delivered hot so that it shrinks in your tank?

Does your Fuel Stay on your Site?
- Does all Fuel go into your vehicles?
- Is there any Theft from your Site Tanks?
- Is there any Leakage from Site Tanks?
- Are Inaccurate Pumps giving fuel away?
Ensures your Fuel is used for your Business:

Does your fuel get into your vehicles?:
- Is fuel ever assigned to the wrong vehicle?
- Is fuel ever put in to non company vehicles?
- Do your staff ever fill other containers as they fuel?

Does your fuel stay in your vehicles?:
- Is fuel ever siphoned from fuel tanks?
- Do any of your vehicles fuel tanks leak?
Ensures your Fuel is used Efficiently:

- Is Valuable Fuel Ever Wasted?
  - Are any vehicles under performing?
  - Do drivers achieve optimal MPG’s?
  - Is White Diesel ever used where Gas Oil should be?
  - Do drivers use fuel cards when they don’t need to?
Do any of the following waste your time and money?

- Do your Sites ever run out of fuel?
- Do low fuel stocks cause delivery of contaminated fuel?
- Do you end up paying more at retail sites when you run out?
- Are vehicles ever given the wrong fuel type?
- Do vehicles ever leave your sites unfuelled?
- How long would you keep going without on site stock?
How much time do you spend Managing Fuel?

- Manually inputting and collating information
- Assessing Site Stocks
- Producing Reports
- Cross Billing between Cost Centres
- Consolidating on and off road fuellings
- Producing Management Reports
What do you currently base crucial strategic management decisions on?

- Do you know how much you spend on fuel?
- Do you know which vehicles are most efficient?
- Which Drivers would benefit from training?
- Is there a cycle to your yearly fuel budget that you need to plan for?
- Do fuel saving measures actually make a difference?
- What difference would switching to Green or other alternate Fuels make?
Fuelling Your Future!
